

MORE BANDWIDTH BETTER DECISIONS STRONGER EXITS

The strongest exits aren't built when a business goes to market. It's created long before.

They're built months and years beforehand through sharper strategy, stronger decision-making and disciplined execution.

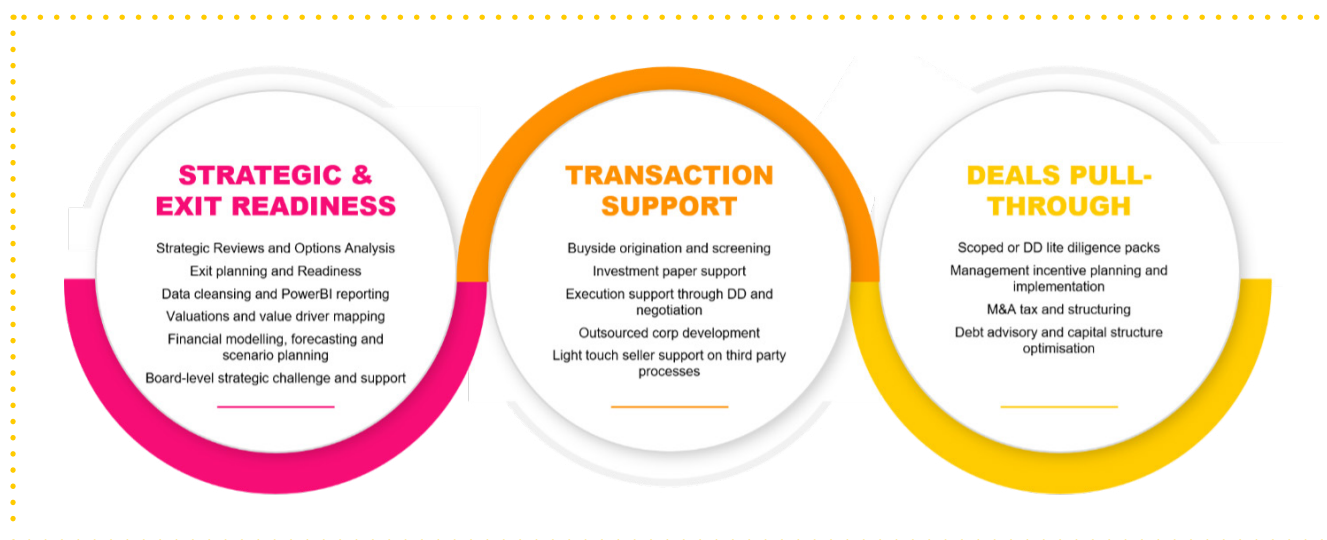

Management teams are focused on running the business. Finance leaders are often adapting to PE ownership for the first time. Buy-and-build strategies, forecasting expectations, board reporting, investment decisions and exit preparation all place additional pressure on finance teams.

THAT'S WHERE COOPER PARRY CAN HELP

We act as an extension of your team, providing the additional bandwidth, commercial insight and execution capability needed to accelerate growth and unlock value.

- Building and executing value creation plans
- Supporting acquisition strategies and buy-and-build programmes
- Forecasting and modelling, strengthening reporting
- Implementing actions identified through due diligence
- Preparing for future investment or exit

We provide experienced, hands-on support exactly when it's needed.

WHAT MAKES OUR APPROACH DIFFERENT IS CONTINUITY

We build long-term relationships with management teams and investors, staying close to the business as plans evolve and opportunities emerge.

That means faster execution, less disruption and a trusted adviser who understands the business, the investment thesis and how to bring in the right expertise at pace.

And because we're part of the wider Cooper Parry ecosystem, we can connect portfolio companies with specialist expertise across due diligence, tax, debt advisory, legal, digital transformation, cyber, change management and more, all through one relationship.

GET IN TOUCH

Giving management teams the clarity, confidence and capability to move faster and deliver more.

Because creating value isn't an event. It's a journey. Let's talk about how we can support your portfolio companies throughout the hold period. Speak to...
